Greetings:

The fact that a 51 year old doctor with no computer training is even able to E-mail you is evidence that Microsoft hasn't harmed consumers. I hear that Linux is preferred by computer cogniscenti, and is FREE, and yet is not as popular as Microsoft-designed software.

Drop your drawn-out prosecution (persecution?) of Microsoft, and aid the INS in deporting the 600,000 potential terrorists with defective visas.

Sincerely,  
Robert Smith MD
